

Connecting your Maverick/Maverick2 Immersive Entertainment System

Wireless Pairing

Before you begin, make sure your TV supports pairing with wireless speakers or audio devices. (Your TV's wireless connection should be version 5.0 or higher.) Have your owner's manual handy or look up online how to connect a wireless speaker to make the process smoother.

- 1. Power On Your Audio System:** Power Turn on your furniture's audio system by finding the power **ON/OFF** button. **PRESS AND HOLD** it until the LED lights turn on or you hear a voice say "POWER ON" (if using the wireless remote).

Location of the power **ON/OFF** button:

- 2. Enter Pairing Mode:** If you have more than one piece of furniture, you only need to pair **one** with your TV. **Choose the one you'll be sitting in most often.**

On that main piece of your furniture, find the **wireless pairing** button. **PRESS AND HOLD** it until the small blue light starts flashing. This means it's ready to pair.

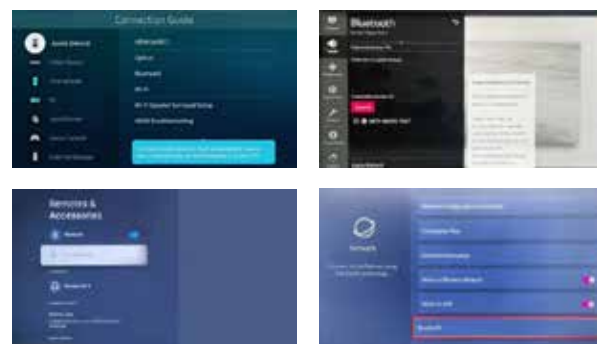

Location of the **wireless pairing** button:

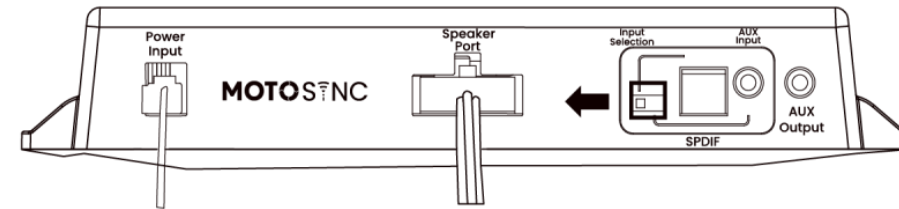

- 3. Pair with TV:** Check your TV's settings menu to find where you can add a wireless audio device. Since every TV is different, you may need your manual or a quick online search for your specific model.

Look for these device names when pairing:

- **Moto Immersive Audio**
- **Moto Media System**
- **Moto Audio**

If our devices are not found, please ensure that your Moto Amplifier is in AUX mode.

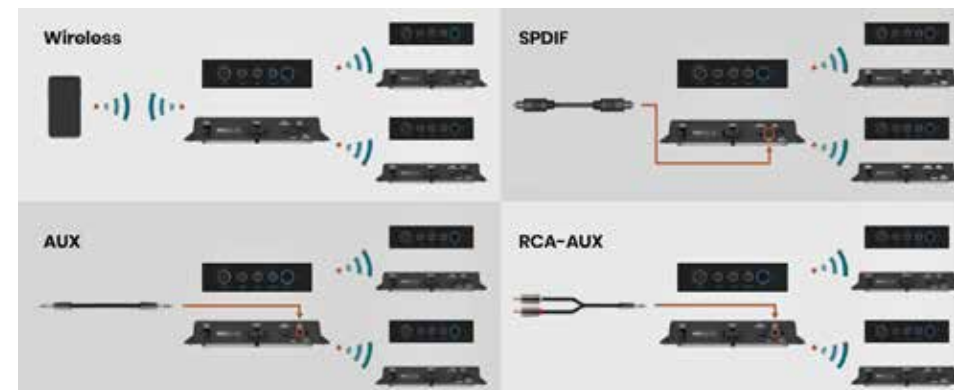

- 4. Activate Broadcast Mode:** Once you've paired with the Moto Media System, make sure the TV's sound is set to use this device. The light on your furniture will stay solid blue when connected. ***Pro tip: Crank the volume up past 90% with your TV remote almost to max for the best sound. Then try playing something to test it.**

If you have more than one piece of furniture, here's the cool part: use **Broadcast Mode**. Start with the piece already paired to the TV. On that same pairing button, **QUICKLY DOUBLE TAP** until you hear "broadcast mode" through the speakers. The light will turn from blue to **SOLID PURPLE**.

Now, turn on the audio system on your other furniture pieces. On each, quickly double tap the pairing button until you hear "broadcast mode." Their lights will glow **SOLID RED** when they're linked.

LED Indicator	Broadcast Mode	System Status
○ Light Off	Off	Broadcast Off / System not paired to any Bluetooth device
★ Blue Light Flashing	Off	Broadcast Off / System in Bluetooth pairing mode
● Blue Light	Off	Broadcast Off / System is paired to a Bluetooth device
● Red Light	On	Broadcast On / System not paired to any Bluetooth device
★ Red Light Flashing	On	Broadcast On / System in Bluetooth pairing mode
● Purple Light	On	Broadcast On / System is paired to a Bluetooth device

Connecting your Maverick & Maverick2 Recliner or Sofa to your TV or Audio system

Connecting your Maverick/Maverick2 Immersive Entertainment System

SPDIF Digital Optical Cable(s) Connection

The cable(s) needed for this setup is **not** included with the purchase of MOTO products. However, these can be purchased at Gardner White using the immersive audio converter kit.

This kit includes the following:

- (1) Digital to Analog Audio Converter
- (1) 3.5mm Female AUX Jack to 2-RCA Adapter
- (1) 25ft Male-to-Male 3.5mm AUX Cable
- (2) 10ft Male-to-Male 3.5mm AUX Cable

1. Switch your Maverick Immersive Amplifier to **SPDIF Mode**.

2. Connect the digital optical cable to the SPDIF input port on your Maverick Immersive Amplifier. Then connect the other end of the cable to the SPDIF output on your audio source.

3. If you are connecting multiple Moto pieces using the SPDIF cables, you also need to purchase an optical splitter*.

Audio Splitter

*Connect the digital optical splitter to your audio source and run separate optical cables to each unit.

3.5mm Auxiliary Audio Cable(s) Connection

The cable(s) needed for this setup is **not** included with the purchase of MOTO products. However, these can be purchased at Gardner White using the immersive audio converter kit.

This kit includes the following:

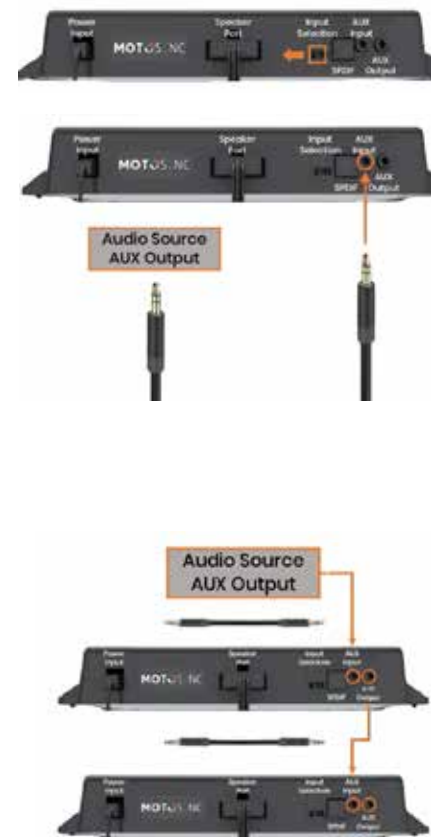

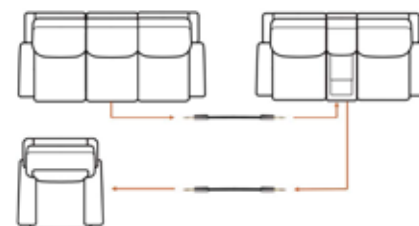

- (1) Digital to Analog Audio Converter
- (1) 3.5mm Female AUX Jack to 2-RCA Adapter
- (1) 25ft Male-to-Male 3.5mm AUX Cable
- (2) 10ft Male-to-Male 3.5mm AUX Cable

1. Switch your Maverick Immersive Amplifier to **Aux Mode**.

2. Connect the 3.5mm auxiliary audio cable to the AUX input port on your Maverick Immersive Amplifier. Then connect the other end of the cable to the AUX output port on your audio device.

3. To connect multiple Moto products together, plug a second 3.5mm auxiliary cable into the AUX output port of the first Moto product, and then into the AUX input port of the next one - daisy chaining them together as shown in the diagram below.

RCA Audio Cable(s) Connection

The cable(s) needed for this setup is **not** included with the purchase of MOTO products. However, these can be purchased at Gardner White using the immersive audio converter kit.

This kit includes the following:

- (1) Digital to Analog Audio Converter
- (1) 3.5mm Female AUX Jack to 2-RCA Adapter
- (1) 25ft Male-to-Male 3.5mm AUX Cable
- (2) 10ft Male-to-Male 3.5mm AUX Cable

1. Switch your Maverick Immersive Amplifier to **Aux Mode**.

2. Plug one end of the 3.5mm auxiliary audio cable into the AUX input port on your Maverick Immersive Amplifier. Attach the RCA end of the adapter cable to the RCA output ports on your audio source.

3. To connect multiple Moto products, first connect the RCA to 3.5mm AUX adapter to your audio source.

Then, plug the 3.5mm auxiliary cable into the AUX input port on the first product.

Next, plug a second 3.5mm auxiliary cable into the AUX output port of the first product and into the AUX input port of the next one.
